Any city and town which accepts the provisions of this section, may by by-law or ordinance deny any application for, or revoke or suspend any local license or permit including renewals and transfers issued by any board, officer, department for any person, corporation or business enterprise who has neglected or refused to pay any local taxes, fees, assessments, betterments or any other municipal charges. Such by-law or ordinances shall provide that:

(A.) The tax collector or other municipal official responsible for records of all municipal taxes, assessments, betterments and other municipal charges, hereinafter referred to as the tax collector, shall annually furnish to each department, board, commission or division, hereinafter referred to as the licensing authority, that issues licenses or permits including renewals and transfers, a list of any person, corporation, or business enterprise, hereinafter referred to as the party, that has neglected or refused to pay any local taxes, fees, assessments, betterments or other municipal charges for not less than a twelve month period, and that such party has not filed in good faith a pending application for an abatement of such tax or a pending petition before the appellate tax board.

ARTICLE XXVIII **STORMWATER**

INTRODUCTION

It is hereby determined that:

Land development projects and other land use conversions, and their associated changes to land cover, permanently alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, which in turn increase flooding, stream channel erosion, and sediment transport and deposition, and decrease groundwater recharge;

Land development projects and other land use conversions also contribute to increased nonpoint source

pollution and degradation of receiving waters;

The impacts of post-development stormwater runoff quantity and quality can adversely affect public safety, public and private property, surface water drinking water supplies, groundwater resources, drinking water supplies, recreation, aquatic habitats, fish and other aquatic life, property values and other uses of lands and waters;

These adverse impacts can be controlled and minimized through the regulation of stormwater runoff quantity and quality from new development and redevelopment, by the use of both structural and nonstructural Best Management Practices;

Localities in the Commonwealth of Massachusetts are required to comply with a number of both State and Federal laws, regulations and permits which require a locality to address the impacts of post-development stormwater runoff quality and nonpoint source pollution.

Therefore, the Town of Dighton has established this stormwater management bylaw to provide reasonable guidance for the regulation of post-development stormwater runoff for the purpose of protecting local water resources from degradation. This bylaw regulates the post-construction stormwater controls for both new and re-development projects.

It has been determined that it is in the public interest to regulate post-development stormwater runoff discharges in order to control and minimize increases in stormwater runoff rates and volumes, post-construction soil erosion and sedimentation, stream channel erosion, and nonpoint source pollution associated with post-development stormwater runoff.

1.0 PURPOSE

- A) The purpose of this Bylaw is to protect, maintain and enhance the public health, safety, environment and general welfare by establishing minimum requirements and procedures to control the adverse effects of increased post-development stormwater runoff and nonpoint source pollution associated with new development and redevelopment. It has been determined that proper management of post-development stormwater runoff will minimize damage to public and private property and infrastructure, safeguard the public health, safety, environment and general welfare of the public, protect water and aquatic resources, and promote groundwater recharge to protect surface and groundwater drinking supplies. This Bylaw seeks to meet that purpose through the following objectives:
1. Establish decision-making processes surrounding land development activities that protect the integrity of the watershed and preserve the health of water resources;
 2. Require that new development, redevelopment and all land conversion activities maintain the after-development runoff characteristics as equal to or less than the pre-development runoff characteristics in order to reduce flooding, stream bank erosion, siltation, nonpoint source pollution, property damage, and to maintain the integrity of stream channels and aquatic habitats;
 3. Establish minimum post-development stormwater management standards and design criteria for the regulation and control of stormwater runoff quantity and quality; Establish minimum design criteria for the protection of properties and aquatic resources downstream from land development and land conversion activities from damages due to increases in volume, velocity, frequency, duration, and peak flow rate of storm water runoff; Establish minimum design criteria for measures to minimize nonpoint source pollution from stormwater runoff which would otherwise degrade water quality;
 4. Establish design and application criteria for the construction and use of structural stormwater control facilities that can be used to meet the minimum post-development stormwater management standards;

5. Encourage the use of nonstructural stormwater management, stormwater better site design practices or “low-impact development practices”, such as reducing impervious cover and the preservation of greenspace and other natural areas, to the maximum extent practicable; Coordinate site design plans, which include greenspace, with the Town’s greenspace protection plan;
 6. Establish provisions for the long-term responsibility for and maintenance of structural stormwater control facilities and nonstructural stormwater management practices to ensure that they continue to function as designed, are maintained, and pose no threat to public safety;
 7. Establish provisions to ensure there is an adequate funding mechanism, including surety, for the proper review, inspection and long-term maintenance of stormwater facilities implemented as part of this Bylaw;
 8. Establish administrative procedures for the submission, review, approval or disapproval of stormwater management plans, and for the inspection of approved active projects, and long-term follow up; Establish certain administrative procedures and fees for the submission, review, approval, or disapproval of stormwater plans, and the inspection of approved projects.
- B) Nothing in this Bylaw is intended to replace the requirements of the Town of Dighton Zoning Bylaws, the Town of Dighton General Wetlands Protection Bylaw, or any other Bylaw that may be adopted by the Town of Dighton. Any activity subject to the provisions of the above-cited Bylaws must comply with the specifications of each.

2.0 DEFINITIONS

The following definitions shall apply in the interpretation and implementation of this Bylaw. Additional definitions may be adopted by separate regulation:

ALTER: Any activity, which will measurably change the ability of a ground surface area to absorb water or will change existing surface drainage patterns. Alter may be similarly represented as “alteration of drainage characteristics,” and “conducting land disturbance activities.”

BEST MANAGEMENT PRACTICE (BMP): Structural, non-structural and managerial techniques that are recognized to be the most effective and practical means to prevent and/or reduce increases in stormwater volumes and flows, reduce point source and nonpoint source pollution, and promote stormwater quality and protection of the environment. “Structural” BMPs are devices that are engineered and constructed to provide temporary storage and treatment of stormwater runoff. “Nonstructural” BMPs use natural measures to reduce pollution levels, do not require extensive construction efforts, and/or promote pollutant reduction by eliminating the pollutant source.

BETTER SITE DESIGN: Site design approaches and techniques that can reduce a site’s impact on the watershed through the use of nonstructural stormwater management practices. Better site design includes conserving and protecting natural areas and greenspace, reducing impervious cover, and using natural features for stormwater management.

DETENTION BASIN: A detention basin is a stormwater management facility installed on, or adjacent to, tributaries of rivers, streams, lakes or bays that is designed to protect against flooding and, in some cases, downstream erosion by storing water for a limited period of a time. These basins are also called "dry ponds", "holding ponds" or "dry detention basins" if no permanent pool of water exists. Some detention ponds are also "wet ponds" in that they are designed to permanently retain some volume of water at all times. In its basic form a detention basin is used to manage water quantity while having a limited effectiveness in protecting water quality, unless it includes a permanent pool feature.

Amended (ATM 06/08/10)

GENERAL STORMWATER MANAGEMENT PERMIT (GSMP): A permit issued for an application that meets a set of pre-determined standards outlined in the Regulations to be adopted by the Board of Health under Section 4 of this Bylaw. By meeting these pre-determined standards, the proposed project

will be presumed to meet the requirements and intent of this Bylaw.

HOTSPOT: Land uses or activities with higher potential pollutant loadings, such as auto salvage yards, auto fueling facilities, fleet storage yards, commercial parking lots with high intensity use, road salt storage areas, commercial nurseries and landscaping, outdoor storage and loading areas of hazardous substances, or marinas.

INFILTRATION BASIN: An infiltration basin is a stormwater management facility designed to direct all or part of the stormwater into the soil. Infiltration is the process by which runoff percolates through the unsaturated over-burdened and fractured bedrock to the water table. Infiltration does not include incidental wetting of soil in ditches, detention basins or the equivalent; wetting of under drained basins, dry swales, or similar filtration systems; or wetting of buffers meeting the town's requirements for use as stormwater control.

Discharge of runoff to areas of the site where the water will collect and percolate into the ground is considered infiltration if the volume, rate, or quality of the discharge exceeds the runoff capacity of the area. Under drained swales, under drained ponds, and similar practices that discharge to surface waters or to buffer strips meeting the town's requirements for stormwater buffers are not considered infiltration systems, although these may be used to treat runoff prior to discharge to an infiltration area.

Amended (ATM 06-08-10)

MASSACHUSETTS STORMWATER MANAGEMENT POLICY: The Policy issued by the Department of Environmental Protection, and as amended, that coordinates the requirements prescribed by state regulations promulgated under the authority of the Massachusetts Wetlands Protection Act G.L. c. 131 § 40 and Massachusetts Clean Waters Act G.L. c. 21, §. 23-56. The Policy addresses stormwater impacts through implementation of performance standards to reduce or prevent pollutants from reaching water bodies and control the quantity of runoff from a site.

NEW DEVELOPMENT: Any construction or land disturbance of a parcel of land that is currently in a natural vegetated state and does not contain alteration by man-made activities.

NONPOINT SOURCE POLLUTION: Pollution from many diffuse sources caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into water resource areas.

PERSON: Any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to Town Bylaws, administrative agency, public or quasi-public corporation or body, the Town of Dighton, and any other legal entity, its legal representatives, agents, or assigns.

PRE-DEVELOPMENT: The conditions that exist at the time that plans for the land development of a tract of land are submitted to the Planning Board. Where phased development or plan approval occurs (preliminary grading, roads and utilities, etc.), the existing conditions at the time prior to the first plan submission shall establish pre-development conditions.

POST-DEVELOPMENT: The conditions that reasonably may be expected or anticipated to exist after completion of the land development activity on a specific site or tract of land. Post-development refers to the phase of a new development or redevelopment project after completion, and does not refer to the construction phase of a project.

RECHARGE: The replenishment of underground water reserves.

REDEVELOPMENT: Any construction, alteration, or improvement exceeding land disturbance of 35,000 square feet, where the existing land use is commercial, industrial, institutional, or multi-family residential.

Amended (STM 11/02/09)

BOARD OF HEALTH: The Board of Health for the town of Dighton or its authorized agent(s) is responsible for coordinating the review, approval and permit process as defined in this Bylaw. Other Boards and/or departments participate in the review process as defined in the Stormwater Regulations adopted by the town of Dighton..

RETENTION BASIN: A retention basin is a type of best management practice (BMP) that is used to manage stormwater runoff to prevent flooding and downstream erosion, and improve water quality in an adjacent river, stream, lake or bay. Sometimes called a wet pond or wet detention basin, it is essentially an artificial lake with vegetation around the perimeter, and includes a permanent pool of water in its design.

It is distinguished from a detention basin, sometimes called a dry pond, which temporarily stores water after a storm, but eventually empties out at a controlled rate to a downstream water body. It also differs from an infiltration basin which is designed to direct stormwater to groundwater through permeable soils.

Wet ponds are frequently used for water quality improvement, groundwater recharge, flood protection, aesthetic improvement or any combination of these. Sometimes they act as a replacement for the natural absorption of a forest or other natural process that was lost when an area is developed. As such, these structures are designed to blend into neighborhoods and viewed as an amenity.

Silviculture: The cultivation and care of trees in a forest; forestry.

Amended (ATM 06/08/10)

STORMWATER CREDITS: A form of incentive for developers to promote conservation of natural and open space areas. Projects that comply with prescribed requirements are allowed reductions in stormwater management requirements when they use techniques to reduce stormwater runoff at the site.

STORMWATER MANAGEMENT PERMIT (SMP): A permit issued by the Board of Health, after review of an application, plans, calculations, and other supporting documents, which is designed to protect the environment of the Town from the deleterious affects of uncontrolled and untreated stormwater runoff.

Public notice of the meeting date will meet the requirements of the Massachusetts General Laws and any relevant town bylaws. After public notice and a public meeting, the Board of Health may promulgate rules and regulations to effectuate the purposes of this Bylaw. TITLE OF BY-LAW

The Preservation of Historically Significant Buildings.

INTENT AND PURPOSE

This by-law is enacted for the purpose of preserving and protecting significant buildings within the Town of Dighton which constitute or reflect distinctive features of the architectural, cultural, economic, political or social history of the town and to limit the detrimental effect of demolition on the character of the town. Through this bylaw, owners of preferably preserved buildings are encouraged to seek out alternative options that will preserve, rehabilitate or restore such buildings and residents of the town are alerted to impending demolitions of significant buildings. By preserving and protecting significant buildings, streetscapes and neighborhoods, this bylaw promotes the public welfare by making the town a more attractive and desirable place in which to live and work. To achieve these purposes the Historical Commission is authorized to advise the Building Inspector with respect to demolition permit applications. The issuance of demolition permits is regulated as provided by this by-law.

DEFINITIONS

APPLICANT

Any person or entity who files an application for a demolition permit. If the applicant is not the owner of the premises upon which the building is situated, the owner must indicate on or with the application his/her assent to the filing of the application.

SIGNIFICANT BUILDING

Any building within the town (city) which is in whole or in part one hundred years or more old and which has been determined by the Commission or its designee to be significant based on any of the following criteria:

PROCEDURE

No demolition permit for a building which is in whole or in part one hundred years or more old shall be issued without following the provisions of this bylaw. If a building is of unknown age, it shall be assumed that the building is over 100 years old for the purposes of this bylaw.

An applicant proposing to demolish a building subject to this bylaw shall file with the Building Commissioner an application containing the following information:

- The address of the building to be demolished.
- The owner's name, address and telephone number.

Upon determination by the Commission that the building is not significant, the Commission shall so notify the Building Commissioner and applicant in writing. The Building Commissioner may then issue the demolition permit.

Upon determination by the Commission that the building is significant, the Commission shall so notify the Building Commissioner and the applicant in writing. No demolition permit may be issued at this time. If the Commission does not notify the Building Commissioner within fifteen days of receipt of the application, the Building Commissioner may proceed to issue the demolition permit

If the Commission finds that the building is significant, it shall hold a public hearing within thirty days of the written notification to the Building Commissioner. Public notice of the time, place and purpose of the hearing shall be posted in a conspicuous place in town hall for a period of not less than seven days prior to the date of said hearing and the applicant and the building inspector shall be notified in writing of the meeting time and place.

The Commission shall decide at the public hearing or within fourteen days after the public hearing whether the building should be preferably preserved. If agreed to in writing by the applicant, the determination of the Commission may be postponed.

If the Commission determines that the building is not preferably preserved, the Commission shall so notify the Building Commissioner and applicant in writing. The Building Commissioner may then issue the demolition permit.

If the Commission determines that the building is preferably preserved, the Commission shall notify the Building Commissioner and applicant in writing. No demolition permit may then be issued for a period of six months from the date of the determination unless otherwise agreed to by the Commission. If the Commission does not so notify the Building Commissioner in writing within twenty one days of the public hearing, the Building Commissioner may issue the demolition permit.

Upon a determination by the Commission that any building which is the subject of an application is a preferably preserved building, no building permit for new construction or alterations on the premises shall be issued for a period of six months from the date of the determination unless otherwise agreed to by the Commission.

No permit for demolition of a building determined to be a preferably preserved building shall be granted until all plans for future use and development of the site have been filed with the Building Commissioner and have found to comply with all laws pertaining to the issuance of a building permit or if for a parking lot, a certificate of occupancy for that site. All approvals necessary for the issuance of such building permit or certificate of occupancy including without limitation any necessary zoning variances or special permits, must be granted and all appeals from the granting of such approvals must be concluded, prior to the issuance of a demolition permit under this section.

The Building Commissioner may issue a demolition permit or a building permit for a preferably preserved building within the applicable delay period if the Commission notifies the Building Commissioner in writing that the Commission finds that the intent and purpose of this bylaw is served even with the issuance of the demolition permit or the building permit.

Following the six month delay period, the Building Commissioner may issue the demolition permit.

ADMINISTRATION

The Commission may adopt such rules and regulations as are necessary to administer the terms of this bylaw.

The Commission is authorized to adopt a schedule of reasonable fees to cover the costs associated with the administration of this bylaw.

The Commission may delegate authority to make initial determinations of significance to one or more members of the Commission or to a municipal employee.

The Commission may pro-actively develop a list of significant buildings that will be subject to this bylaw. Buildings proposed for the significant building list shall be added following a public hearing.

EMERGENCY DEMOLITION

If after an inspection, the Building Commissioner finds that a building subject to this bylaw is found to pose an immediate threat to public health or safety due to its deteriorated condition and that there is no reasonable alternative to the immediate demolition of the building or structure, then the Building Commissioner may issue an emergency demolition permit to the owner of the building or structure. The Building Commissioner shall then prepare a report explaining the condition of the building and the basis for his decision which shall be forwarded to the Commission.

ENFORCEMENT AND REMEDIES

The Commission and/or the Building Commissioner are each specifically authorized to institute any and all actions and proceedings, in law or equity, as they may deem necessary and appropriate to obtain compliance with the requirements of this by-law or to prevent a threatened violation thereof.

Any owner of a building subject to this bylaw that demolished the building without first obtaining a demolition permit in accordance with the provisions of this bylaw shall be subject to a fine of not more than Three Hundred Dollars. Each day the violation exists shall constitute a separate offense until a faithful restoration of the demolished building is completed or unless otherwise agreed to by the Commission.

If a building subject to this bylaw is demolished without first obtaining a demolition permit, no building permit shall be issued for a period of two years from the date of the demolition on the subject parcel of land or any adjoining parcels of land under common ownership and control unless the building permit is for the faithful restoration referred to above or unless otherwise agreed to by the Commission.

HISTORIC DISTRICT ACT

Following a determination that the building is significant and preferably preserved, the Commission may recommend to town meeting that the building be protected through the provisions of Massachusetts General Law, Chapter 40C, and the Historic Districts Act. The steps required under M.G.L. Chapter 40C shall be followed prior to the establishment of a local historic district. Nothing in this by-law shall be deemed to conflict with the provisions of the Historic District Act, Massachusetts General Laws Chapter 40C. If any of the provisions of this by-law do so conflict, that act shall prevail.
